

## **SURVEILLANCE OF FASCIOLOSIS IN RUMINANTS**

### **(CATTLE, CARABAO AND GOAT)**

The Surveillance of Fasciolosis in Ruminants (Cattle, Carabao and Goat) is a project of the Nueva Vizcaya State University in collaboration with the Provincial Veterinary Office of Isabela.

The project aims:

1. To determine the prevalence of Fasciolosis in Region 2.
2. To identify the most sensitive protocol that can be used in the field.
3. To recommend control and preventive strategies.

Activities conducted under this project are fecal and blood collection as confirmatory diagnosis in the presence of other parasites present in the animal.
