## OFFICE OF THE PROVINCIAL HEALTH OFFICER

May 1-15, 2016

### Significant Accomplishment of Field Health Services

#### **“Localized Health Planning: Roadmap for Better Health Management”**

As a result of the revisions made thru interviews and consultation activities spearheaded by the Department of Health, a revised guideline called, *Local Investment Plan for Health for 2017-2019* emerged. This project significantly considered the LGU experiences, challenges, and innovations in local health planning.

With its aim to apply the revised guidelines and procedures in the local levels, the Provincial Health Office under the sterling leadership of Dr. Rosa Rita B. Mariano, PHO II, an orientation was conducted last May 5-6, 2016 and was held at Piazza Hotel & Restaurant, Upi, Gamu, Isabela. All program managers attended the activity and the Provincial DOH-RO2 team led by Dr. Elsie Pintucan unselfishly shared their expertise as they acted as facilitators. The PHO team, fully equipped with the guidelines shall cascade the planning process to local planners for them to analyze and manage their health data. The over-all output will then be the Local Investment Plan for Health (LIPH) 2017-2020 and Annual Operational Plan (AOP) 2017.

A PHO personnel discusses the background of the orientation

The Provincial Health Officer II delivers her inputs during the open forum

The Provincial DOH-RO2 team shares their expertise in their assigned topics

Creation of Provincial Technical Assistance LIPH Planning team per district

One of the PHO team of doctors clarifies her concerns in filling-up the LIPH templates

## OFFICE OF THE PROVINCIAL HEALTH OFFICER

### Effective Public-Private Partnership for Malaria-Free Isabela! Program Implementation Review

Through the collaborative work of all concerned agencies, the Province of Isabela is determined towards the elimination of Malaria at all levels of operation starting from the barangays to achieve zero case findings.

Malaria, despite the rapid and substantial reduction in incidence remains a formidable adversary in the local health scene. One way of making the program more sustainable is to make the approach purely preventive. This means maintaining a population, completely informed and committed to actively participate in the Anti-Malaria drive, even after we have achieved zero case province-wide during the past year.

Opening remarks by Dr. Rosa Rita B. Mariano, PHO II during the Malaria Program Implementation Review for the year 2015 held at Mango Suites Hotel Santiago City, February 22, 2016

The Medical Coordinator of the Department of Health Regional Office 2 discusses the regional malaria status of Region 2 for the year 2015
