28-Nov	5	2	0
29-Nov	4	2	2
30-Nov	1	2	7

Admissions in City / Municipal Local Government Units' TTMFs were only ranging from 0-7 COVID-related patients for the month. The few number of admissions is consistent with the low cases of COVID-19 reported in the province. Most admitted cases were confirmed cases, followed by suspect cases and then few probable cases. Aside from TTMF admissions, most COVID related cases reported this month were still isolated or quarantined at home or in the hospitals. The full report on the specific number of COVID patients per category as to their TTMF of admission is contained in Table below.
